CHARACTERISTICS

Long tiller mounted on low chassis

Safety

- Safety distance due to long drawbar protects against accidents
- Low chassis prevents injuries to the feet
- Automatic electromagnetic brake and belly switch reduce risk of accidents
- Efficient parking brake prevents the pallet truck from rolling away on loading ramps or slopes

All controls ergonomically integrated in the Linde tiller head

Ergonomics

- Compact chassis and small turning circle ensure best maneuverability in confined spaces
- Creep speed with vertical tiller arm enables precise, smooth steering
- Ergonomically shaped tiller head facilitates operation with both hands using the dual butterfly lever
- The Curtis control enables sensitive load handling and individual adjustment of speed and acceleration

Optimal visibility of the forks and load at all time

Handling

- Effortless load handling over gradients up to 6 percent thanks to electric drive
- The reinforced forks carry up to 1.5 tons load
- Fast transport over short distances with maximum speed of 4.5 km/h
- Stepless lowering of the forks enables precise lowering of the load

Easy plug and play Li-ION battery

Service

- The robust DC motor enables long maintenance intervals and reduces operating costs
- The maintenance and emission-free lithium-ion battery system enables non-stop operation for up to 1.7 hours
- Short charging cycle and opportunity charging provide long operating times
- Easy battery replacement via plug-and-play
